

# Digging Deep: Exercising Root Cause Techniques

*Tuesday, January 22, 2022, 1:00 p.m. EST*

On 2/22/2022 at 1:00 p.m. EST, the SMCX will host the “Digging Deep: Exercising Root Cause Techniques” workshop.

This workshop provides information on root causes and contributing factors and reviews three techniques to conduct root cause analysis (RCA). This workshop evaluates a scenario with hands-on use of three techniques to identify root causes and contributing factors for an injury. The workshop concludes by using RCA results to identify corrective actions to improve the safety management system and prevent injuries and illnesses going forward.

Individual DoD Components have training requirements for S&H professionals conducting mishap investigations. However, this intermediate-level workshop is beneficial to personnel scheduled to attend mishap investigation training, or those wanting to refresh their knowledge, or refine their skills, in RCA. Attendees should have a fundamental knowledge of RCA prior to the workshop. Personnel gaining the most benefit from this workshop may include: safety and health (S&H) professionals, supervisors, and other personnel involved in investigating incidents.

Please click the article headline or registration link [here](#) to register for this FREE workshop.

***NOTE: We will be capping attendance at 100, so be sure to register early!***
